LIGHTING UP SLOVENIA WITH INTELLIGENT INSIGHTS

Technology solutions provider INFORMATIKA is changing the way Slovenia’s electricity distributors are serving their customers. From mainly just supporting these companies’ billing processes, it’s now delivering more value by expanding its solutions to include Big Data analytics and artificial intelligence (AI) and by helping them improve customer experiences. It has also extended its services to wholesale power suppliers, becoming a key provider to Slovenia’s energy industry.

OBJECTIVES

- Expand the company’s services and solutions as well as market
- Help electricity companies to improve their customer experiences
- Ensure uninterrupted operations and access to data

REQUIREMENTS

- Increase compute capacity to support new applications and services
- Roll out powerful servers to accelerate virtualization and enterprise resource planning (ERP) performance

- Improve the management of compute resources and speed up network provisioning

SOLUTION

- HPE Synergy 480 Gen10 compute modules
- HPE Synergy 12000 frames
- HPE OneView
- HPE Packaged Support Services

KEY PARTNERS

- HC Center d.o.o.

OUTCOMES

- Delivers better value to energy companies through new applications and uninterrupted services
- Enables energy consumers to monitor their electricity usage in real time
- Saves on licensing costs, reduces maintenance work hours by 50%, and accelerates provisioning by more than 50x
