Product Overview

- The Intel Xeon Gold 6433NE is a 4th Gen Intel Xeon Scalable processor for extended-temperature network, edge, communications, and server workloads.
- It delivers 32 cores and 64 threads, with a 2.00 GHz base frequency, up to 3.60 GHz Intel Turbo Boost frequency, 60 MB cache, and a 205 W TDP.
- Built on Intel 7 process technology, the processor is designed for single-socket platforms and supports eight DDR5 memory channels with ECC support.
- DDR5-4400 memory and 64 PCI Express 4.0 lanes provide bandwidth for network adapters, storage, accelerators, and other platform I/O.
- Intel DL Boost, Intel vRAN Boost, AVX-512, two AVX-512 FMA units, and one default Intel DSA device support selected data-plane and communications workloads.
- Extended temperature options, SGX with Intel SPS, Total Memory Encryption, Boot Guard, Control-Flow Enforcement Technology, and Intel virtualization technologies support demanding deployments.

Product Highlights

- **32-Core Edge Compute:** 32 cores and 64 threads provide high parallel processing capacity for communications servers, edge nodes, virtualized network functions, and service workloads.
- **2.00 to 3.60 GHz Frequency Range:** The processor combines a 2.00 GHz base frequency with up to 3.60 GHz Intel Turbo Boost frequency for responsive burst performance.
- **Extended-Temperature Platform:** The 6433NE provides the same 32-core compute profile as the 6433N and adds Intel-listed extended temperature options for suitable system designs.
- **DDR5-4400 and PCIe 4.0 Expansion:** Eight DDR5-4400 memory channels and 64 PCIe 4.0 lanes support high-throughput memory and I/O designs in single-socket servers.

Component	Specification
Processor	Intel Xeon Gold 6433NE, 32 cores / 64 threads
Ordering Information	PK8071305451200, FC-LGA16A Tray, Spec Code SRN2C
Frequency and Cache	2.00 GHz base, up to 3.60 GHz turbo, 60 MB cache
Memory	Up to 4 TB DDR5-4400, 8 channels, ECC supported
Power and Expansion	205 W TDP, 1S, PCIe 4.0 with 64 lanes

32-Core Edge-Server Compute

The 6433NE combines 32 physical cores with 64 threads and a 205 W TDP. This gives network and edge servers substantial parallel compute capacity for virtualized network functions, analytics, security services, and consolidated infrastructure workloads.

Extended-Temperature N-Series Design

The 6433NE belongs to Intel's N-series 4th Gen Xeon Scalable processors and is listed with extended temperature options. This makes it relevant to communications, outdoor, industrial-edge, and other deployments where the system environment requires a wider operating-temperature design.

Frequency and Cache Balance

The 2.00 GHz base frequency can reach up to 3.60 GHz with Intel Turbo Boost Technology 2.0. A 60 MB cache helps keep frequently accessed data close to the cores, supporting responsive control-plane and service processing.

Single-Socket Platform Efficiency

The processor is specified for 1S scalability and uses the FCLGA4677 socket. A single-socket design can simplify topology and reduce platform complexity in compact edge, security, storage, and network-function deployments.

High-Capacity ECC Memory

The processor supports up to 4 TB of DDR5-4400 memory across eight channels, with ECC support for server-class reliability. The memory capacity gives single-socket systems room for virtualized network functions, caches, analytics, and service containers.

PCIe 4.0 I/O for Data-Plane Devices

Sixty-four PCIe 4.0 lanes provide expansion capacity for Ethernet adapters, storage controllers, accelerators, and other high-bandwidth devices. The lane budget helps designers build balanced I/O around one processor socket.

Acceleration for Communications Workloads

Intel vRAN Boost targets virtualized radio access network processing, while Intel DSA provides one default device for data movement. Intel DL Boost and AVX-512 support selected inference, packet-processing, and analytics operations.

Security and Virtualization Foundation

The processor includes Intel SGX with Intel SPS, Total Memory Encryption, Boot Guard, Control-Flow Enforcement Technology, AES instructions, VT-x, VT-d, and Extended Page Tables. These capabilities help protect workloads and support virtualized server platforms.
